# Solar Return Planets

---

## Sun in the eleventh house (☉ - XI)

This year encourages you to reevaluate societal norms and conventions. It's a time for questioning the established rules and structures that shape your life. You may find yourself consciously objecting to certain norms or disregarding them altogether, driven by a strong desire for personal freedom and individuality.

The 11th house represents your hopes, dreams, and aspirations for the future. This year, you are prompted to assess whether your goals align with your values and aspirations. Some dreams may prove realistic and worthy of pursuit, while others may need to be discarded as impractical or unsuitable. Accept this opportunity to clarify your vision for the future.

Freedom becomes a significant factor influencing your decisions and actions. If you've been feeling restricted or suppressed, this year provides a chance to break free from those limitations. You may even forsake your former patterns of behavior or conduct, especially if you're in a committed relationship or have other personal ties that feel constraining.

Unconventional ideas and impulses may arise, challenging conventional thinking. While these thoughts may seem impractical or detached from reality, they reflect your desire for personal growth and exploration. Accept this process with open-mindedness, as it can lead to meaningful self-discovery.

Friendships and social connections take on a prominent role. You may find yourself drawn to like-minded individuals who share your unconventional perspectives. These relationships, though potentially less intense than romantic partnerships, offer opportunities for meaningful connections and self-expression. Through these interactions, you learn to communicate your thoughts and ideas effectively to a diverse audience, expanding your social circle.

## Moon in the seventh house ( ☾ - VII )

With the Moon in the 7th house of your solar return chart, there's a high likelihood of entering nurturing relationships. These relationships don't have to be romantic; they can also be close friendships or professional connections. You might find yourself taking care of family members or offering your time and resources to someone in need. If you're in a service-oriented job, you'll be very attentive to others' needs.

Your relationships this year will involve a lot of personal involvement and concern. It's likely you'll relate closely and regularly with those you are helping. If the relationship is non-romantic, it may feel one-sided, with one person giving more and the other receiving. This dynamic is common in both professional and informal counseling relationships, where roles often aren't equal.

In intimate relationships, issues of dependency may arise. You and your partner might take on polarized roles, such as one being the caregiver and the other the receiver. Even established relationships may see shifts, with one partner needing more support than usual, be it emotional, financial, or physical. This imbalance requires careful attention and nurturing.

You might become more emotionally invested in your relationships. Ideally, you'll build a pattern of mutual support. However, if your partner can't meet your needs, the relationship could become emotionally draining. Expect your moods to impact your relationships, as you'll be more emotionally expressive this year.

You'll be more emotional and might follow your heart over your head, focusing on emotional fulfillment rather than logical analysis. Understanding this dynamic will help you manage relationship challenges. Look at your partner's capability and willingness to grow with you emotionally. Since change and fluctuation are likely, be prepared for both positive and negative shifts in your relationships. By focusing on emotional learning, you can successfully navigate these changes.

## Mars in the eighth house (♂ - VIII)

Mars in the 8th house this year can lead to significant changes in sexual, financial, and psychological areas. Sexual issues could revolve around changing needs, attitudes, and ethics. You may experience fluctuations in physical needs and practices. It's important to recognize and own your body and desires, leading to a mature understanding of sexual ethics. The quality of your sexual relationships will become very important, and you will likely express your needs more fully.

This period might involve exchanging sexual information with friends, neighbors, or family, which could help you understand your needs better. Engaging in fulfilling sexual relationships can promote growth and positively influence other parts of your life. However, if you feel used or unrewarded, it might be time to reassess these relationships. Mars in the 8th house can bring conflicts related to sexual behavior, particularly if there are differences in moral standards between you and your partners.

Financial issues could come to the forefront, often related to shared resources or debts. If debt is a concern, seeking advice from a financial advisor might be beneficial. Disagreements over spending priorities and joint finances can arise, and it's important to handle these discussions calmly and logically. You might need to take a closer look at how you manage shared resources and work towards a balanced approach.

Psychologically, Mars in the 8th house can bring deep-seated anger and long-lasting resentment to the surface. You might find yourself dealing with unresolved conflicts from the past. Understanding and addressing these old issues can help you release this negative energy.

Confronting your anger intelligently can lead to greater emotional freedom and personal growth. By understanding your anger response and working through these feelings, you can maintain better control over your life and destiny.

## Mercury in the eleventh house (☿ - XI)

When Mercury occupies the 11th house, you'll likely question social restrictions and

evaluate their relevance to your life. You'll aim to personalize limitations, making them fit better with your individual needs. It's possible that your personal needs will conflict with society's expectations. For example, if you're in a challenging marriage and feel attracted to someone new, you might contemplate an affair. The pressure from your personal situation may contradict social norms.

This placement often leads to a mental exercise in reevaluating these norms, rather than acting on them. You'll engage in intellectual debates, questioning the rules you live by and developing a new personal code of ethics.

The 11th house also emphasizes the balance between group needs and individual desires. You'll likely be involved with groups or social situations that focus on this balance. Working within a group can help you achieve goals more effectively than working independently. You'll need to share thoughts and set new goals collectively. Communication among group members will be crucial, especially in pressing issues or self-help groups.

Sometimes, group goals may overshadow individual needs. For instance, a business group might prioritize holding down expenses over ensuring adequate salaries for members. This can cause tension if your individual needs conflict with the group's objectives.

Personal freedom is a key issue. Whether dealing with friends, groups, or society, you'll find that your freedom is limited to some extent by your relationships. You must navigate these restrictions carefully to avoid infringing on others' rights and freedoms. Issues like monogamy and loyalty might become significant.

This year is decisive for setting goals and questioning established norms. Be open to new ideas and directions that help formulate future goals. The questioning process will open your mind to new ways of thinking and free you from unnecessary restrictions. By reassessing, you'll distinguish practical goals from unrealistic dreams, justifying your need for freedom while pursuing new goals for the future.

## Jupiter in the seventh house ( ♃ - VII )

This year, your relationships will be a source of growth and positive development. Others will readily offer their assistance and support, even without being asked directly. This help can come from expected sources like a spouse, but also unexpectedly from acquaintances or new connections. Exchanging knowledge and perspectives with others will enrich your understanding and help you navigate life's challenges.

If you are married, your relationship with your spouse is likely to improve and become more fulfilling. Difficult marital problems from the past have a good chance of being resolved now, especially if you seek professional guidance such as couples therapy. You and your partner will become more attuned to each other's needs and complaints, fostering greater intimacy, insight, and cooperation in your marriage.

Promising new relationships may enter your life, whether romantic, platonic or professional in nature. You'll find that interacting with a variety of people expands your horizons and augments your success in any endeavor. Creating a climate of compatibility and mutual gain will attract supportive partners. However, avoid becoming overly dependent on others, as you still need to develop self-reliance.

In some cases, the benefits of this placement may be delayed or subtle rather than immediate or obvious. Don't get discouraged if your relationship or personal growth goals aren't instantly fulfilled. With patience and openness to learning from others, you'll make steady progress. The key is to listen to feedback, maintain an optimistic outlook, and be willing to make adjustments based on input from partners. By working collaboratively and staying attuned to the needs of important people in your life, you'll enhance both your relationships and personal development this year.

## Venus in the first house ( ♀ - I )

This year, you will exhibit a gentle demeanor, avoiding conflicts and not wishing to hurt others' feelings. You will likely adopt a non-aggressive and non-assertive approach, which can sometimes make you vulnerable to others' demands. This can feel overwhelming, especially if there are oppositions between planets in the 1st and 7th houses, dividing

your attention between your needs and those of others.

Balancing your desire to help others by focusing on your own needs and protecting your interests from external influences will be crucial. You need free time and energy to pursue your interests, making self-protection and balancing essential themes this year. It will be important to safeguard your personal space and opinions from the demands of others.

You may find yourself withdrawing from social interactions and spending more time alone, enjoying your own company. This preference for solitude can arise from a desire to avoid superficial interactions or to protect your interests. Graduates living alone for the first time or individuals separated from loved ones might experience this placement.

If there is a strong opposition from the 1st to the 7th house, you might alternate between seeking solitude and focusing on relationships, leading to an all-or-nothing lifestyle. While solitude may be necessary for personal projects, such as a writer needing time alone to work on a novel, this time is also used to foster creativity and productivity.

You may also feel overwhelmed by others' demands. For example, someone whose neighbors frequently sought her help eventually had to retreat to maintain her peace. This need for solitude may stem from a desire to escape uncontrollable situations or to create a more manageable environment.

With Venus in the 1st house of your solar return chart, benefits and comforts are self-made. You will advance through your efforts, focusing on personal satisfaction and becoming more aware of your skills and abilities. This period emphasizes self-reliance and the importance of protecting your well-being.

### **Saturn in the third house ( ♄ - III )**

This year, you are likely to focus on study or mental work. Your studies are serious and crucial to your future goals. This period is excellent for tackling difficult mental tasks or complex topics. You might engage in major projects that require concentration, persistence, and organization. Activities could include taking a course, writing a book or paper, studying for exams, or consulting with others to gather new insights.

If you finish your project within the year, great, but if Saturn moves to the 3rd house next birthday, your work might extend another year. This placement often relates to long-term projects and significant achievements. Your active mind needs a positive focus. Whether studying or working on a major task, using your mental energy constructively will help prevent depression and anxiety.

Major decisions arise this year, demanding careful evaluation. You must balance your needs with others' and assess your situation realistically. Seeking advice from a counselor or trusted person can help. Depression may be an issue if you struggle to find solutions. Address any depressive feelings by seeking help and improving communication.

Everyday tasks might feel more taxing, and you could find common chores troublesome. Moving to a new place or dealing with unfamiliar situations may require more patience. Problems with siblings are possible, as family-related issues might arise. If a sibling faces a problem, this could be the year for them to handle it responsibly, with your support being crucial.

If your sibling refuses to address their issues, you might feel forced to act on their behalf or distance yourself. Productive siblings will likely handle problems well, while others may show issues consistent with their usual behavior. Your encouragement can be very supportive during this critical time.

## **Uranus in the sixth house ( ♅ - VI )**

This year you may experience significant changes in your work or working conditions. These alterations could be self-initiated or beyond your direct control, leading to a job change, temporary positions, or even breaks in employment.

If you are currently employed and dissatisfied with your job, now may be the ideal time to explore new opportunities. You could investigate different placements or consider transferring to another office under your current employer. Some individuals may even choose to take a bold step and start their independent projects or businesses, embracing the freedom of self-employment.

Additionally, scheduling changes within your workplace are highly likely during this

period. Your office may adopt a more flexible or rotating schedule, allowing you to set your hours. While this can provide a greater sense of autonomy, it may also lead to a nerve-wracking, tedious, and stressful work environment, particularly if you tend to be restless and crave constant change.

Regardless of the specific changes you encounter, it is essential to maintain an adaptable and open-minded approach. This is a time for you to fully embrace your individuality and allow your unique talents and ideas to flourish. The new challenges and shifting routines can serve as catalysts for creativity and innovation, pushing you to think outside the box and find innovative solutions.

However, it is crucial to be mindful of the impact these transformations may have on your physical and emotional well-being. Practicing stress management techniques, such as relaxation exercises and proper self-care, will be vital in ensuring you have adequate time for rest and recuperation. Disruptions and adjustments are inevitable, but by navigating them with flexibility and self-awareness, you can unlock your full potential and find greater fulfillment in your work.

Remember, the changes you experience this year are not only likely but necessary for your personal and professional growth. By accepting the opportunities for self-expression and independence, you can unleash your true potential and embark on a journey of self-discovery. This is a time to let go of old habits and embrace the freedom to be your authentic self, even if it means navigating some challenges along the way.

## **Neptune in the fourth house ( ♃ - IV )**

This year you may experience a sense of uncertainty and instability surrounding your home and family life. This placement can introduce a level of flux and confusion into the domestic sphere, making it challenging to establish a clear sense of direction or stability.

One common manifestation of this placement is the potential for relocation or changes in your living situation. You or the people you live with may be considering a job-related move, but the exact destination or timing may remain uncertain for an extended period. Even if you decide to stay put, you may have family members coming and going

throughout the year, causing disruptions and a lack of clarity about who will be living with you and when.

This domestic uncertainty can also extend to caring for elderly relatives or family members in need. You may find yourself providing physical, financial, or emotional support to a loved one, but the extent and duration of this assistance may be unclear. Indecisiveness and a "wait-and-see" attitude may characterize your approach as you navigate the unfolding situation.

Alongside the practical challenges, this placement can also contribute to a sense of emotional ambiguity. Your feelings may not be entirely clear to you, and you may experience dilemmas in trying to reconcile competing emotional needs or perspectives. This can be particularly true if you are dealing with a withdrawn or emotionally distant family member, where misunderstandings and a lack of clear information persist.

However, it's important to approach this period with a sense of compassion and spiritual attunement. The uncertainty and flux you experience in the home and family realm may be a catalyst for you to develop a deeper connection to your sense of purpose and a higher-level understanding of your role within the domestic sphere. By accepting this newfound sensitivity and compassion, you can begin to establish a new code of behavior and spiritual awareness that can be expanded to other areas of your life.

## **Pluto in the second house ( ♃ - II )**

This year, you might experience significant changes in your financial situation. Pluto in the second house often brings fluctuations in income, with possibilities for both increase and decrease. It's not uncommon to consider entering or leaving the job market during this time. Assessing the aspects from Pluto to other planets can provide more insights into these changes.

The main task for the year is to gain control over your finances, including both income and spending. You may feel a strong need to manage your own money, set a budget, and stick to it. Learning to handle money responsibly will be crucial. This might involve trimming unnecessary expenses or setting up a savings plan if you don't already have

one. Maintaining tight control over your spending will help you navigate any financial ups and downs.

Personal financial control might cause tension in shared finances with a spouse, parent, or significant other. It's possible that financial struggles over debts and expenses arise, especially if you haven't maintained good control in the past. You may need to save money for future goals, realizing the importance of financial independence. Some may need to live on less money now to secure future stability.

Financial control can feel all-or-nothing. Impulse spending and large expenses can severely impact your capital, leading to a year of financial disruption if not managed well. It's essential to keep a close eye on your spending to avoid such pitfalls.

Changes in self-worth are also associated with changes in income. You might measure your value based on your financial status, which can be challenging if your income decreases. It's important to separate your self-worth from material success, understanding that your value isn't defined by money.

With Pluto in the second house, focusing on financial control and redefining your sense of self-worth will be key themes this year.

## Sun Square With Mars

Challenging

3.45

Oh, have you got an aggressive temperament! And from this birthday to your next, you're going to want to do everything you can to keep that under control. Your energy levels are sky-high, but that means they're pushing your impatience factor off the charts.

You'll find you have difficulties connecting with and truly understanding yourself, which will make it even more challenging for you to connect with those around you. Everyone from employers to loved ones could make you feel as though you're under attack, but you'll need to remember that this is just a phase and no one is really out to get you. One of the greatest advantages of this time will be your strength of character. If you can realize what's happening -- why you're losing your temper because your sweetie was two minutes late, or why your boss seems more demanding than usual -- then you can channel that energy toward improving the situation and calming yourself down. Focus this same energy on solitary projects and exercise, as well, since the more outlets you develop for yourself, the more successfully you'll get through these challenges.

## Sun Trine With Jupiter

Harmony

6.69

What's better than optimism? Having your optimistic hopes and beliefs turn into reality. This will be an excellent year for your career, as everything you've been working on will finally reach the big payoff, and you'll receive the recognition you deserve for all your efforts.

There's nothing like the power of positive thinking (and traditional good, hard work) to help bring about great results! You've also got a great opportunity on your hands to improve your love life. You're so generous and big-hearted that it will be hard for anyone to not fall for you, and that confidence of yours is equally sexy. In addition, you might

want to take a look around at your life and try to determine if it's as absolutely great as it could be, or if there may be some things to improve. The timing couldn't be better for bringing about change than when you're in an idealistic frame of mind -- it makes letting go of the old or the negative so much easier. This is true for any aspect of your life. Meanwhile, if you're in the mood to expand your world, consider traveling. A far off place will add culture and knowledge -- as well as a bit of excitement -- to your own life. Your personal growth will inspire others.

### Sun Square With Pluto

Challenging

1.85

You cannot keep living your life as you have been. Something must change, and if you don't make that happen, then the Universe will -- and it won't be pretty. Like a snake shedding its skin, you must peel away at your own layers and protective barriers.

As you do so, you'll become more and more true to yourself -- and only then will you be able to successfully conquer anything else life throws your way. Transformations like this are never easy, and you'll find your year is complicated by power struggles, emotional entanglements, self-denial and obsessive-compulsive tendencies. Accept any challenging tasks that are offered up. They may be difficult, and you may find they bring you to the end of your ropes, but when you finally finish, the end result will take you to a higher level of personal acceptance. Each accomplishment can also help take you to the next stage of your development. Relationships of all kinds will be especially trying and fraught with deceit and secrets. But that may work out in the end -- you'll need to accept that this is a year for you to focus on your own personal growth.

### Moon Conjunction With Jupiter

Dynamic

8.32

Moon conjunct Jupiter in your solar return chart signals a year of emotional positivity and growth. This alignment brings a sense of happiness and contentment, encouraging an optimistic outlook on your future and potential for success. Your talents and abilities

are highlighted, making this an excellent time for professional advancement and spiritual evolution.

In relationships, expressing your feelings becomes crucial for your emotional development and the growth of your connections. Jupiter's influence expands your capacity for emotional expression, while the Moon highlights your emotional nature. Together, they emphasize the importance of sharing emotions, understanding them, and growing from these interactions. Emotional interchange and relatedness are key to this aspect, fostering intimacy and healing in your relationships.

However, the placement of the Moon and Jupiter in specific houses can bring overwhelming emotions. For instance, if the Moon is conjunct Jupiter in the 4th house, which relates to home and family, you might feel overwhelmed by family responsibilities or emotional care. Sensitivity and vulnerability are common themes, potentially leading to feelings of being overwhelmed by emotion, especially if they are in the 12th house.

It's important to convey serious emotions alongside cheerful ones, particularly in situations requiring candid emotional expression. If you're involved in humanitarian work or need volunteers, your passionate and enthusiastic portrayal of the situation can inspire others. Using your emotions constructively benefits both your personal growth and your ability to help others. Emotional expansion into new areas of expression enhances your capacity to relate meaningfully to others.

Overall, Moon conjunct Jupiter encourages you to welcome optimism, enthusiasm, and openness. This year is about growing emotionally, nurturing your relationships, and using your emotional insights to make a positive impact in your personal and professional life.

### Moon Square With Saturn

Challenging

0.46

The Moon square Saturn in your solar return chart can bring emotional challenges and a need for internal control. You might feel unable or unwilling to express your emotions openly, fearing misunderstandings or lack of support from others. This aspect often

indicates a weak emotional support system, making it hard to rely on others.

You may face obstacles or delays in your plans due to external influences. Someone might stand in your way, making it tougher to move forward. Even if you have supporters, their help might not be enough. You'll need to muster the stamina to push through important projects despite emotional strain. Responsibility will often take precedence over emotional expression. Once you have a goal in sight, your determination will help you overcome any barriers.

Feeling isolated and solely responsible for your welfare is common with Moon Square Saturn. You might need to be strong for others, especially if you are caring for someone seriously ill. This responsibility can add to your emotional burden. It's crucial to stay strong and not fall into despair, as this won't help anyone and could worsen the situation. Major decisions will require careful thought and may come with feelings of regret or resignation. You'll need to view situations from all angles and make decisions that are realistic and practical. Sometimes, you might have to choose between limited options, often involving sacrifices. Delays and frustrations are likely, but they also teach the importance of patience and perseverance.

In times of stress, focus on what is practical and make the best decisions you can. By addressing issues as they arise, you can navigate through challenges effectively. Saturn's influence emphasizes strength and mastery, guiding you through these tough times.

## Mars Sextile With Uranus

Opportunities

1.97

It's been said that fools rush in where angels fear to tread. Though you'll certainly fall under the category of fool this year, few people will be able to fault you for it. You'll have an original and unique take on the world around you, and you'll come up with innovative and successful approaches to tried and true methods.

And this won't just be about how to make a better TV (though it could be). You'll be on a mission to improve the world. You'll have beliefs to stand up for, and you may find yourself becoming something of a freedom-fighter. Your creative thoughts will fuel a fire

toward a brighter tomorrow, but this year, your cause will probably still be unfamiliar to most and, therefore, seem a bit radical. In reality, this is because you'll have a very forward-thinking bent. In time everyone else will catch up (due, at least in part, to your incredible efforts), but in the meantime, you'll have to deal with working in defense of your cause. If possible, use this as a positive outlet for that rebellious, fighting spirit that will be building up within you. This will be an excellent opportunity for you to channel your rebel qualities into making a real difference in the world.

Though you may not realize it yet, you have the potential to influence large groups of people. The two areas where you'll see the greatest affects will be entertainment and charity. If you think those have nothing to do with each other, think again.

One of the most useful things you can do for someone is provide them the occasional healthy escape from life -- it's no coincidence that people who couldn't afford anything during the depression still managed to get into movies, or that this was one of Hollywood's most successful eras. If you wanted to get into the entertainment industry, this will be a great year because you'll have the necessary aggression and persistence to get your foot in the door. Your fantasy world will be strong, and your ability to motivate yourself will be even stronger. You'll have a natural dramatic ability, so go out for a local production if Hollywood seems too far away. If you'd like to help out where you are (as you likely will), take some time to work at a volunteer organization or charity. You'll have an uncanny knowledge of what other people need, and your skills as a negotiator will help guarantee that they get it. Regardless of which direction you take, you'll be sure to come out successful by the time you reach your next birthday.

Organized, efficient, detail-oriented. One might almost begin to think that your goal for

the year is to satisfy as many qualifications on a job posting as possible. Well, there are certainly worse goals out there than trying to do well at work, and with the way things are lining up for you above, it looks like this could be a banner year for your career. Your communication skills are well developed and you'll be able to process just about any piece of information that crosses your path.

Supervisors and coworkers alike will be thrilled with your focused attention on all the little things that really make a project come together; no detail will be too small for your keen eyes. Use this time to prove just how effective you truly are, and don't be surprised if your industrious attitude helps you move up that ladder. Romantically, this could be a good year as well. Your attention to detail will make anyone feel special, and whether you direct this toward a current lover or someone new, you can bet they'll be eager to pursue the relationship further. In fact, if you're not already married, this is an ideal time to consider a more serious relationship than one you've had in the past.

Do you want to work towards a progressive future, or do you want to use more traditional methods to keep your life flowing smoothly? Those are the two directions you'll be torn between as you move through the coming months. This may not seem like much of a difficulty right away, but don't underestimate the trouble that can be wrought when trying to decide between progressive and conservative -- one need only to look at the political dramas occurring all over the world to see how much of an impact these beliefs can have. In fact, you may begin to feel like there's a political battle raging within you.

You'll start to feel as if you've become two people, as part of you tries to engage your intuition and vision, and the other half works to apply practical and tangible methods to any problems you face. What makes life hard will be a lack of communication between these two sides. You'll only start to experience an improvement to this situation when you learn to find the middle ground of these two opposing forces. In the meantime, you'll need to accept that you're going to be something of an inconsistent mess of mood

swings, which could leave those closest to you feeling dizzy. Just remember that it's more important to have a consistent philosophy than a consistent technique.

Reality is almost never the way you imagine it to be. For example, you're working on a project and you know you're doing your best work. So you start imagine how your supervisor will react.

They're going to give you a promotion -- and a raise! You start to think about what you're going to do with the extra money (it will be a lot, of course). And then your computer freezes up and you lose all of your work because you forgot to back it up. Does that sound like a familiar scenario? Something along those lines has happened to everyone at some point, but this could practically become a theme for your year. So how do you work around such delusions? Hard as it may be, about all you can do will be to buckle down and really focus on the project at hand. Your imagination will clearly be working in overtime, so try to channel that energy into something successful -- put all of your daydreams into a journal, and you may have some exciting, publishable stories by the end of the year. Process everything in your life carefully, and do what you can to leap over any emotional or psychological barriers that might hold you back. You certainly have the mental capacity for achievement, but it will all depend on how successfully your can focus yourself.

Your intuition is strong, and your dreams are perceptive. This is your year to learn how to use them to their fullest. The connections you have with people are so strong that you may appear psychic at times, but really, this will just be you showing off your incredible powers of perception.

You'll be able to read people like books, and with just a glance. It's in that glance that

you'll be searching for your soul mate. Your romantic ideals will reach a peak, and you won't want to settle for anything less than absolute perfection. Write out a list of all the qualities you're looking for in a partner. Now cut that list in half. That will be a more realistic approach to either finding someone new or fully appreciating the lover you already have. Spirituality will be strong for you, too. This next year will be no time to worry much about careers, but rather about dreams, about your connection to this world, about your connection to the people in this world. Because you'll be so in tune with everything around you, you'll find your understanding of the mass consciousness and opinion will be quite strong. You'll easily relate to large numbers of people because you'll appreciate their needs and desires.

### Venus Sextile With Pluto

Opportunities

3.86

There is no such thing as a shallow love for you. Everything you do for the next 12 months will be done at the absolute deepest level, and you won't have any patience for small talk or superficial acquaintances. Get to know people for who they really are on all levels, especially your partner (or someone who may soon be your partner), and you'll discover a whole new world of relationships.

It is through this knowledge that you'll achieve understanding, and it's through understanding that you'll achieve acceptance. You'll find that the more you know and understand people, the harder it is for you to feel anything but true affection for them. You'll find this acceptance also draws you to people in need -- you'll want to help anyone you can. Channel your subconscious, creative energies, and you'll come up with unique and successful methods to assist anyone who needs it. By effectively communicating your most basic values, you'll also find that you're more likely to come into contact with those people with whom you can have the deepest connections. You can use this skill to avoid those shallow associations that will drive you crazy.

## Uranus Sextile With Neptune

Opportunities

1.42

Ever notice how so many of the greatest artists and writers got no credit for their work when it first came out? That's because they were too far ahead of their times -- sort of like you in the coming months. The exception being that you won't have quite as hard a time getting your ideas out (though it will still be a challenge).

You'll have a wonderful openness to new thoughts and concepts, and you'll develop a clear style of communication that will help others see and understand your point of view. They may not agree at first, but they'll come around eventually. You will develop a lovely balance between science and spirituality this year. Technology will motivate you to turn to your spiritual side in an effort to understand all that's going on and why it's here. You might want to turn to less orthodox realms such as astrology, tarot or the occult to satisfy the unusual side of you. It will be your goal to push the boundaries of human knowledge farther out, and if anything can raise some eyebrows it will be going out of the mainstream for religious or spiritual beliefs. You, if no one else, will certainly develop a highly evolved understanding of the dynamics of human experience.

## Uranus Trine With Pluto

Harmony

3.34

There are things about you that could maybe use a little change. So what do you do? You go out and fix them immediately.

And these really aren't 'little' or superficial changes like a haircut -- these are life-altering transformations that you'll just jump up and take care of. Job not going well? Change it. Love life not working out as you'd hoped? Change it. Confused about what your dreams mean? Go to counseling. In fact, this year would be a great time to consider psychotherapy. You'll be so receptive to opening yourself up and accepting the suggestions of others because your desire to improve yourself from the core out will be so strong. The one thing you might want to watch out for will be your dislike of authority. You will practically break out in hives if someone tries to tell you what to

do. Unfortunately, in this life, there will always be someone one rung above you who has more power and authority. You can rebel all you like, and you might even get past whoever is there now, but there will always be someone else -- everyone in this world reports to someone, and the higher up you go, the more precarious your perch. This is one of those instances in which you'll be better off just accepting that there are some things in life you have to live with.

## Neptune Sextile With Pluto

Opportunities

1.92

The cycle of life says that something must die in order for more life to go on. This could be something traumatic like a mother dying in childbirth, but that's extremely rare compared to all the other little things that occur by the millions every day. A piece of rotten fruit in a field provides nutrients to animals passing by or the soil below it.

A caterpillar turns into a butterfly. Even you getting rid of old clothes to make room for new ones falls under this category. Change and transformation are simply processes of life, and ones that we deal with every day. This year, however, you'll be more sensitive to the transformations that occur, and they'll become a part of who you are. It will likely be a very spiritual time for you, as you will begin to question all that goes on around you. Just what is the reason for our cyclical behavior? How can one concept apply to every aspect of life (e.g. for every action there is an opposite and equal reaction)? These questions and many others will plague you as you make a transition from simply accepting the world around you, to really seeing its complexities and wondering if a powerful being is in charge, or if everything just fell into place somehow, like a well-oiled machine.
